📁 Projects Highlighting Key Skills:

🌱 **PayForm Pro: Modular RazorPay Integration** [🔗](#) [📁](#)
| Next.js - API route, Redux, MongoDB, crypto-js, RazorPay API |

- Modular Codebase: React Hook for each task in the RazorPay Payment Gateway API integration, improve debugging, maintainability, and clarity of the entire process.
- Webhook Validation & Crypto-js: Integrated RazorPay webhooks and used crypto-js (SHA-256) for end-to-end transaction signature validation.
- Mongo Database: Stored data of successfully generated order ID for efficient retrieval and management.

🌱 **DocuChat AI: Python FastAPI | Docker Hub** [🔗](#) [📁](#)

- Developed token streaming responses with Server-Sent Events (SSE) and improve performance and reduce latency.
- Dockerized and deployed the service on AWS (EC2, ECS).

🌱 **DocuChat AI: Retrieval-Augmented Generation (RAG) - powered PDF chat app** [🔗](#) [📁](#)

| Supabase pgVector DB, Hugging Face, langchain, openrouter |

- DocuChat AI – A RAG-powered PDF chat application that lets you upload documents and ask questions, with cited page references and transparent source tracking.

🌱 **Team Task Board: (Mini Jir) (Beta)** [🔗](#) [📁](#)

| Supabase (Auth, Realtime, RLS), zustand, TanStack Query |

- Real-time task management with Kanban board, activity timeline, role-based access.
- Auth: email/password + magic link (fixed redirect bug). Realtime subscriptions for tasks & logs.
- Mobile-first responsive UI (Tailwind + shadcn/ui). GTM analytics for user tracking.
