📁 Projects Highlighting Key Skills:

🌱 PayForm Pro: Modular RazorPay Integration [🔗](#) [📁](#)

| Next.js - API route, Redux, MongoDB, crypto-js, RazorPay API |

- **Modular Codebase:** Each **hook** represents a specific task in the RazorPay integration process, enhancing readability, maintainability, and facilitating a comprehensive understanding of the entire process.
- **Next.js API Routes:** Efficiently handle form submissions, payment processing, and seamless verification.
- **Error Handling:** Implemented intuitive error messages on both the frontend and backend. Utilized distinct HTTP status codes (e.g., 405, 422) for specific scenarios, ensuring secure processes.
- **Webhook Validation & Crypto-js:** Integrated RazorPay's webhook for transaction validation, using Crypto-js (SHA-256) to ensure secure and accurate payment verification on both server-side and client-side.
- **Mongo Database:** Stored data of successfully generated order ID for efficient retrieval and management.
- **DDoS Protection:** Implemented measures to protect against DDoS attacks, including limiting database access to the last 24 hours of data and restricting access to a maximum of 7 times to safeguard against excessive requests.
